## **PRESS RELEASE**

CyberGuard360 (CG360), a leading provider of cybersecurity solutions based in Connecticut, US, has entered into a Memorandum of Understanding (MoU) with Neil Gogte Institute of Technology (NGIT), Hyderabad for an Unique Industry driven Research and Development initiative at a Technology Institute campus on a crucial and challenging Cybersecurity domain.

Announcing this, Mr. Neil Gogte, Chairman of NGIT, said that as per the MoU, NGIT will do Research and Development in Cybersecurity Enhancement Techniques, in collaboration with CyberGuard360. The research initiative is worth US\$ 234,000 (₹1.9 Crore) and for a period of 3 years, he added.

In this research initiative, NGIT' Research faculties will carry out core research in the Cybersecurity areas driven by CG360 Security & Software Engineering Experts and Scientists. A number of Intellectual Property (IP) artifacts like Software Programs, Scripts, Prototype, Publications on Internationally reputed Science Journals and Probable patents will be generated during the period. With active participation of NGIT students in this research will give working opportunity and foster the knowledge of Real-time industry trends to the students.

Mr. Stephen Lobo, Co-Founder of CyberGuard360, said that the research will focus on three broad areas:

1. Analysis and development of scalable Cyber Risk Scoring Model
2. Driving towards a better Risk Assessment model through Gap analysis on Automated Technical Risk Assessment and Manual Risk Assessment
3. Effective Data Protection and Recovery against modern Ransomware.

About Cyberguard360:

CyberGuard360 (CG360), is a US based leading provider of Cybersecurity & Compliance solutions. The company provides a B2B2B SAAS solution. The Product Suite that is constantly evolving consists of CP360: A Prospecting Toolkit for MSP's and MSSP's

PG360: A Training and Compliance Portal for SMB's

OB360: An Automated Penetration and Vulnerability Assessment Portal

RA360: An Advanced Risk Assessment Portal

About NGIT:

A premier technology institute in the Hyderabad Metro started by Keshav Memorial Technology Education Society (KMTES). With 3 technology institutes of KMTES in this Software-Pharma metro, producing 1000 Computer Science Engineering graduates, with 500 engineers in AI/ML every year. These institutes have academic and research collaboration with reputed institutes like, Emory University, USA, Instituto Português de Oncologia do Porto Francisco Gentil, EPE, Porto (Portugal), BIRAC-DBT (Biotechnology industry Research Assistance Council-Dept of Biotechnology), Tech Mahindra, and Virtusa.
